

## stainless steel tube feeder

Easy to clean and sanitize. Eliminates scuffing to protect calf's throat and reduce bacteria.

## stainless steel cleaning brush

Protect your calves by ensuring that your equipment is clean.

## digital thermometer

Check calves temperature with this flex tip thermometer, reads within 10 seconds.

## calf warmer

Keep newborn calves in a comfortable environment during their first hours. The raised floor facilitates good heat circulation and dries your calves quickly with a fully adjustable, high-performance, 110 volt heater. Easy to clean and made of durable plastic you can even order it with an optional steel hitch for towing.

## calf jacket

Velcro-less design prevents jacket from falling off the calf and limits collection of dirt

## calf jackets

- 3M Thinsulate™ keeps your calves warm and dry
- contoured for best fit and cleanliness; easily removable straps
- materials designed for commercial washing and drying
- available in classic black or special needs red
- non-quilted water-resistant shell
- two sizes large (holstein) and small (jersey)
- full 2-year quality guarantee

## colostrum testing

**“Testing was a game changer for us.”**

“Before we started testing colostrum we would dump all the heifers’ colostrum. Once we started testing, we found out that we were wasting good colostrum and feeding the poor. Now, we test all of our colostrum.”

- Brian H., Brillion, WI 600 cows

## digital refractometer

Digital refractometer is the most precise way of measuring your colostrum or passive transfer of immunity. In only three seconds it displays precise results. Always measure the quality of your colostrum. Research shows that up to 50% of colostrum is not of good quality. Test it, so you can feed your calves the best.

## colostrum bank

Chill colostrum quicker every time. Digital thermostat allows you to adjust temperature on a scale from -35°F to 40°F.

- fast freeze
- twin-turbo fans
- energy efficient (1.4 Amps)
- automatic/manual defrost
- glass front door
- self closing door
- 7 fully adjustable shelves
- interior lighting
- lockable
- compact design
- 4 caster wheels

## COLOQUICK

The Colostrum Management System

- ▶ **The Only Complete System:** the ColoQuick is the only colostrum management system that comes with all accessories on day one, so that you can start managing your calves' health immediately. This includes, colostrum bags, cartridges, feeding equipment, colostrometer or refractometer, filling station and even a fast freeze freezer
- ▶ **Thaw or Pasteurizer Models:** you can choose a simple thaw system that will thaw two portions of colostrum in 15 min or a combination of thaw and pasteurize capabilities on a scale from 2 portions up to 8 portions to fit your farm
- ▶ **Temperature Sensors:** the colouquick Pasteur units are equipped with several sensors to ensure pasteur accuracy every time
- ▶ **Data Logs:** all units are equipped with a USB port, which enables you to download data on Colostrum pasteurizing making it possible to monitor both equipment and employees

- ▶ **Pump Agitation:** our pasteurizers use pump agitation to ensure the best mixing of milk ensuring proper pasteurization and prevent molecular clumping
- ▶ **Programmable Cycles:** schedule pasteurization for a convenient time, "pre-cool" program will keep milk cool until the cycle starts
- ▶ **Temperature Sensors:** are located either on tank (20 gal model) or draw line to pump constantly verifying proper temperature
- ▶ **Touch Screen:** easy to navigate, provides status throughout cycle
- ▶ **Clean-in-Place (CIP) System:** full automatic cleaning saves time
- ▶ **Peristaltic Chemical Pump:** guarantees accurate doses and prevents contamination
